

# WIRELESS PLASTIC PIPE LOCATING

---

## **TELEMARK MARKER TAPE (WATER/SANITARY/GAS/TELECOM)**

### PRODUCT DESCRIPTION

Combination warning tape with markers attached at 20-foot intervals. Markers are locatable with any marker locator.

### USER BENEFITS

- Marker locating technique is easy to learn and use.
- Unaffected by external influences, i.e., HVAC, adjacent conductors, fences.
- Avoids tracer wire continuity requirements.
- Marker tape distinguishes between other utilities' services - a signature.
- High stretch warning tape provides early warning against dig-ins.

### HOW IT WORKS

- Electronic markers reflect signal to locator, indicating/confirming pipe location.
- Two or more markers indicate plastic pipe path.
